SECTION 3. HAZARDS IDENTIFICATION

NOTE: Please refer to Section 11 for detailed toxicological information.

Emergency Overview
Hazard to humans and domestic animals. Keep out of reach of children and animals. Applicators should wear gloves and wash hands thoroughly after handling. Avoid prolonged exposure to sunlight (active will degrade). Do not apply directly to water.

Odor
None
Material Safety Data Sheet

MAXFORCE® Professional Insect Control® Granular Insect Bait

Immediate Effects

Eye Avoid contact with the eyes.

Skin Avoid contact with skin.

Ingestion May be harmful if swallowed.

Medical Conditions Aggravated by Exposure No specific medical conditions are known which may be aggravated by exposure to this product.

SECTION 4. FIRST AID MEASURES

Ingestion Obtain medical attention. Do not induce vomiting or give anything by mouth to an unconscious person. If swallowed, drink two glasses of water and induce vomiting by touching the back of the throat with finger.

SECTION 5. FIRE FIGHTING MEASURES

Flash Point 94 °C / 201 °F
Method: Tagliabue Closed Cup
Not flammable or explosive

Fire and Explosion Hazards Avoid heavy hose streams, airborne dusts of the active ingredient, Hydramethylnon, may create explosive hazard.

Suitable Extinguishing Media Water, Foam, Carbon dioxide (CO2), Dry chemical

Fire Fighting Instructions Wear self-contained, positive pressure breathing apparatus and full fire fighting protective clothing.

Keep unnecessary people away. Use as little water as possible. Dike area of fire to prevent pesticide run-off. Use spray or fog - solid stream may cause spreading.

Conduct fire fighting and rescue operations from upwind of the fire area. Evacuate people downwind who may come in contact with smoke, fumes, or contaminated surfaces. Do not decontaminate personnel or equipment, or handle broken packages or containers without protective equipment as specified in the Section 8. Decontaminate emergency personnel with soap and water before leaving the fire area.

Avoid breathing dusts, vapors and fumes from burning materials. Alert medical personnel to be ready to treat for pesticide poisoning. Control run-off water - if water enters a drainage system, advice the authorities downstream.

Dust Explosion Class The active ingredient, Hydramethylnon, has been treated in a 20-liter spherical bomb (per NFPA 68-1978) and has been found to be a Class 2 dust explosive hazard. If the material is further processed, the dust explosion hazard may change and it should be retested.
### SECTION 6. ACCIDENTAL RELEASE MEASURES

| General and Disposal | Place in a container for disposal. Sweep up spilled material. Non-hazardous waste. Wear appropriate gear for the situation. See Personal Protection information in Section 8. Flush with water. |

### SECTION 7. HANDLING AND STORAGE

| Handling Procedures | Do not use on edible food or on areas intended for edible food crop production. Avoid contamination of food, food contact surfaces and feedstuffs. Indoor applications are limited to areas that are inaccessible to children or pets. |
| Storing Procedures | Pets may be attracted to this product. Keep pets away from treated areas for at least 24 hours after application. Do not contaminate water, food, or feed by storage or disposal. Keep away from sources of ignition and protect from exposure to fire and heat. Avoid contamination from other insecticides. Keep container closed when not in use. Store in a place accessible by authorized persons only. Keep in a dry, cool place. |
| Work/Hygienic Procedures | Employees engaged in handling bulk quantities of Hydramethylnon should remove clothing and shower prior to exiting the work site. All employees working with the material should wash their hands prior to consuming food or tobacco products. A NIOSH-approved respirator must be worn by employees where it is not feasible to use engineering controls and employee-exposure exceeds 1.4 mg/m3. A NIOSH-approved cartridge respirator for pesticides is acceptable for exposure up to 10 X the TWA. Use a NIOSH-approved air or self-contained pressure demand respirator for higher levels of exposure. Food, gum and tobacco products should not be allowed in areas where material is being processed. |

### SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

| Engineering Controls | Local exhaust ventilation should be used to maintain exposures below the 8-hour TWA and to control the generation of airborne dust from the active ingredient, Hydramethylnon, at points of transfer or other points where full enclosure is not feasible. |
| Eye/Face Protection | Dust-proof goggles are recommended for employees engaged in operations where there is a risk of accidental exposure to eyes from the active ingredient, Hydramethylnon. |
| Body Protection | Normal work clothing, like cloth overalls, is indicated. |
| Respiratory Protection | A NIOSH-approved respirator must be worn by employees where it is not |
feasible to use engineering controls and employee-exposure exceeds 1.4 mg/m3.

General Protection
All electrical wiring and equipment should meet the provisions of NFPA-70.

Exposure Limits
None Established

SECTION 10. STABILITY AND REACTIVITY

Chemical Stability
Stable under recommended storage conditions.

SECTION 11. TOXICOLOGICAL INFORMATION

Acute Oral Toxicity
The value mentioned relates to the active ingredient hydramethylnon. Male Rat: LD50: 1,131 mg/kg Moderately toxic.

Acute Dermal Toxicity
The value mentioned relates to the active ingredient hydramethylnon. Rabbit: LD50: > 5,000 mg/kg Practically non-toxic.

Acute Inhalation Toxicity
The value mentioned relates to the active ingredient hydramethylnon. Practically nonhazardous.

Skin Irritation
The value mentioned relates to the active ingredient hydramethylnon. Rabbit: moderately irritating Subacute dermal studies in which rabbits were exposed to the active ingredient at levels of 250 mg/kg/day for 21 days did not reveal any adverse findings.

Eye Irritation
The value mentioned relates to the active ingredient hydramethylnon. Rabbit: Reversible irritation after 24-hour wash phase. No irritation after a 20-second wash phase.

Chronic toxicity
No conclusive oncogenic effects were observed in mice and rats at any dose level tested. However, under microscopic examination, from chronic feeding studies in rats, mice and dogs, there was wasting of muscle and subcuaneous fat as well as testicular atrophy in high dose males. Decreased body weight, anorexia and signs of amaciation were prominent in high dose feeding groups (200 ppm)

Assessment Carcinogenicity
ACGIH
None
Reproductive & Developmental Toxicity

In a multi-generation reproduction study, reproductive performance was not compromised by hydramethylnon administration. However, all high dose treatment groups (200 ppm) exhibited decreased body weights, anorexia and poor fertility.

Teratogenicity

No teratogenic effects were found at any dose level tested in albino rats. However, at the dose level of 30 mg/kg/day (highest dose tested), hydramethylnon produce both maternal and embryotoxic effects.

Mutagenicity

Technical Hydramethylnon was examined in the Ames mutagenicity test and was found to be nonmutagenic. Similar results were achieved in a Dominant Lethal Test conducted in male rats treated with hydramethylnon by gavage for 5-days.

SECTION 12. ECOLOGICAL INFORMATION

Environmental Precautions

Do not apply directly to water. Do not contaminate surface or ground water by cleaning equipment or disposal of wastes, including equipment wash water. Toxic to fish.

SECTION 13. DISPOSAL CONSIDERATIONS

General Disposal Guidance

Dispose in accordance with all local, state/provincial and federal regulations. Do not contaminate water, food, or feed by storage or disposal.

Container Disposal

Do not reuse empty container for any use other than this product. Wrap empty container and place in trash can.

RCRA Classification

Not Regulated under this Statute

SECTION 14. TRANSPORT INFORMATION

US DOT: NOT REGULATED for Domestic Surface Transport

IMDG: NOT REGULATED for Maritime Transport
